PROJECTS

Learning Management System (LMS) | Github [↗](#) | [Live Site](#)

November 2024

- **Interactive Learning Platform:** Engineered a web application enabling students to enroll in courses, monitor progress, and complete assessments. Empowered instructors to create and manage courses, upload resources, and evaluate student submissions.
- **Technological stack:** Implemented using the MERN stack (MongoDB, Express.js, React.js, Node.js), along with Redux Toolkit for efficient state management, ensuring a smooth and dynamic user experience. Additional tools include Multer for file uploads, JWT for authentication, and Stripe for payments.

Job Portal | Github [↗](#) | [Live Site Here](#)

April 2024

- **Job Application Management:** Developed a comprehensive web app enabling candidates to apply for jobs, track application status, and receive real-time updates. Recruiters can create and post job openings, and manage applications by accepting or rejecting candidates. Implemented secure authentication.
- **Technological stack:** Utilized the MERN stack (MongoDB, Express.js, React.js, Node.js) to build a responsive and scalable platform.

ShopSphere - E-Commerce Platform | Github [↗](#) | [Live Site Here](#)

June 2023

- **E-Commerce Platform:** Created a scalable platform for users to browse products, add items to their cart, and complete purchases, featuring comprehensive order tracking. Led the API development and backend architecture using MVC for effective product management.
- **Tech Stack:** Built using the MERN stack (MongoDB, Express.js, React.js, Node.js), integrated with Razorpay for payments, and implemented JWT-based authentication for secure user sessions.
